

Over 700 investigators can't be wrong.

CCTS PANELS - More minds lead to stronger translational science—and fundable grant scores! CCTS offers panels for every stage of a research project, from conceptualization and development to refinement prior to grant submission and commercialization. Since 2013, CCTS has conducted panels for hundreds of investigators, with a success rate that is three times the NIH funding line.

Visit uab.edu/ccts/research-commons/panels and request a CCTS panel today!
