

EMERGENCY PROCEDURES

IN THE EVENT OF A RADIATION INCIDENT

- 1** Withdraw a safe distance from the affected area and restrict the area as much as possible.
- 2** Turn off hoods, fans, air conditioning, and close open windows and lock doors.
- 3** Notify the Radiation Safety Officer of your location and condition.
- 4** If a radiation survey instrument is immediately available, monitor self for personal contamination. In any case, do not leave the immediate area until determined to be free of contamination.
- 5** Summarize the situation as briefly as possible to the Radiation Safety Officer upon his arrival.
- 6** After normal working hours, immediately call the Paging Operator (934-3411) and ask for the Radiation Safety Officer (or his designate if he cannot be reached) to be notified.
