

From Dr. Craig Powell
Chair, Department of Neurobiology

Please join me in congratulating Neurobiology Faculty Dr. Lucas Pozzo-Miller on his new role as Co-director of UAB's Comprehensive Neuroscience Center working with our new CNC Director Dr. Adrienne Lahti. They will have a tough act to follow after the ground-breaking leadership of Dr. Lori McMahon and Dr. Peter King since 2012.

This is a well-deserved position for Dr. Pozzo-Miller who does so much for our department and the UAB neuroscience community as Co-director of the Neuroscience Theme in GBS, Director of GBS Course on Neurodevelopment, previously serving leadership roles in CNC including oversight of CNC Cores, and overseeing Civitan International Research Center Neuroimaging Core, among many other areas of service to UAB and to the broader neuroscience community. Of course Dr. Pozzo-Miller does all of this while maintaining his very active research laboratory and pioneering new techniques to study neurons, circuits, and behavior.
